This book contains the accepted papers at *ProSocrates'17 Symposium: Problem-solving, Creativity and Spatial Reasoning in Cognitive Systems*¹. ProSocrates'17 symposium was held at the Hansewissenschaftskolleg (HWK) of Advanced Studies in Delmenhorst, 20-21 July 2017. This was the second edition of this symposium which tries to bring together researchers interested in spatial reasoning, problem solving and creativity.

These ProSocrates'17 proceedings contains 6 accepted papers that were presented at the symposium. Each submitted paper was reviewed by two/three program committee members. Moreover, there were 6 invited talks whose abstracts are also included in these proceedings.

Acknowledgements

The funding from the Hansewissenschaftskolleg (HWK) of Advanced Studies² is gratefully acknowledged.

The support from the projects *Cognitive Qualitative Descriptions and Applications*³ (CogQDA) funded by the University of Bremen and *Creative Problem Solving in Cognitive Systems*⁴ (CreaCogs) funded by DFG are acknowledged. The collaboration from our colleagues at Bremen Spatial Cognition Centre (BSCC) is also acknowledged.

We would like also to thank the members of the Scientific Committee for their valuable work during the reviewing process and the additional reviews.

We also thank EasyChair, which was used to manage paper submissions and reviewing the proceedings, and CEUR Workshop Proceedings (CEUR-WS.org) for indexing these proceedings.

Table of Contents: ProSocrates'17

Invited Talks

- *Reasoning at a Distance by Way of Conceptual Metaphors and Blends*
Marco Schorlemmer
- *Symbolic models and computational properties of constructive reasoning in cognition and creativity*
Tarek Besold
- *Creating and rating harmonic colour palettes for a given style*
Lledó Museros
- *Creative Support Companions: Some Ideas*
Ken Forbus
- *Modeling visual problem-solving as analogical reasoning*
Andrew Lovett
- *Thinking Like A Child: The Role of Surface Similarities in Stimulating Creativity*
Bipin Indurkha

Papers

- *Towards finer-grained interaction with a Poetry Generator* 1
Hugo Gonçalo Oliveira, Tiago Mendes and Ana Boavida
- *Towards the Recognition of Sketches by Learning Common Qualitative Representations* 11
Wael Zakaria, Ahmed M. H. Abdelfattah, Nashwa Abdelghaffar, Nermeen Elsaadany, Nohayr Abdelmoneim, Haythem Ismail and Kai-Uwe Kuehnberger
- *Using Stories to Create Qualitative Representations of Motion* 19
Juan Purcalla Arrufi and Alexandra Kirsch
- *Investigating Representational Dynamics in Problem Solving* 29
Benjamin Angerer and Cornell Schreiber
- *An Approach to Compose Shapes Described Qualitatively: A Proof-of-Concept* 40
Albert Pich and Zoe Falomir
- *Problem-solving, Creativity and Spatial Reasoning: A ProSocrates 2017 Discussion* 45
