

Table of Contents

Full Research Papers	1
On the Labeling Correctness in Computer Vision Datasets <i>Mohammed Al-Rawi and Dimosthenis Karatzas</i>	1
Semi-supervised and Active Learning in Video Scene Classification from Statistical Features <i>Tomáš Šabata, Petr Pulc and Martin Holena</i>	24
Active Stream Learning with an Oracle of Unknown Availability for Sentiment Prediction <i>Elson Serrao and Myra Spiliopoulou</i>	36
ActivMetal: Algorithm Recommendation with Active Meta Learning <i>Lisheng Sun-Hosoya, Isabelle Guyon and Michele Sebag</i>	48
Alignment-Based Topic Extraction Using Word Embedding <i>Tyler Newman and Paul Anderson</i>	60
Extended Abstracts	73
Human-Technology Relations in a Machine Learning Based Commuter App <i>Lars Holmberg</i>	73
An Interactive Learning Scenario for Real-time Environmental State Estimation Based on Heterogeneous and Dynamic Sensor Systems <i>Agnes Tegen, Paul Davidsson and Jan Persson</i>	77
Adaptive Selection of Gaussian Process Model for Active Learning in Expensive Optimization <i>Jakub Repický, Zbyněk Pitra and Martin Holena</i>	80
Towards Interactive Feature Selection with Human-in-the-loop <i>Maialen Larranaga, Dimitra Gkorou, Thiago Guzella, Alexander Ypma, Faegheh Hasibi and Robert Jan van Wijk</i>	85
Transfer of Knowledge for Surrogate Model Selection in Cost-Aware Optimization <i>Zbyněk Pitra, Jakub Repický and Martin Holena</i>	89
Embodiment Adaptation from Interactive Trajectory Preferences <i>Michael Walton, Ben Migliori and John Reeder</i>	95
