Preface

Stochastic modeling and applied probability continue to be a hot topic in the theoretical computer science and mathematics domain. For various cutting-edge applications, such as high performance computing and communications systems, production systems, social networks, healthcare applications, the methods of applied probability, statistics, stochastic simulation join forces with game theory, neural networks and computational advances in order to provide qualitatively new results.

The Second International Workshop on Stochastic Modeling and Applied Research of Technology (SMARTY 2020) was held in Petrozavodsk, Karelia, one of the beautiful places in the North-West Russia, on August 16-20, 2020.

SMARTY workshop aims to bring together researchers working on the theoretical, algorithmic and methodological aspects of queueing theory, stochastic modeling and game theory, focusing on applications of such methods across a broad spectrum of technical systems with primary interest in high-performance and distributed computing systems. We received 26 submissions out of which we selected 18 for inclusion in the digital proceedings. The accepted papers cover a wide range of issues, from theoretical research to practical experience and applications.

We thank the authors, invited and keynote speakers for the submissions as well as for their contribution which have made the Workshop useful and successful in all respects. We thank the Organizing Committee and Technical Program Committee for their hard work.

December 2020

Evsey V. Morozov, Alexander S. Rumyantsev
Oleg V. Lukashenko

Organizing Committee

Alexander Rumyantsev
Alexandra Borodina
Irina Peshkova
Ksenia Zhukova
Lusine Meykhanadjian
Natalia Nikitina
Oleg Lukashenko
Rostislav Razumchik
Ruslana Nekrasova

Technical Program Committee

Abhijit Datta Banik
Achyutha Krishnamoorthy
Agassi Z. Melikov
Alexander N. Dudin
Alexander Veretennikov
Alexander Zeifman
Andrey Pechnikov
Antonis Economou
Balasubramanian Krishna Kumar
Binyamin Oz
Deepak Thazhungal Govindan
Dieter Fiems
Dmitry Kozyrev
Douglas Down
Erol Gelenbe
Evgeny Ivashko
Evsey Morozov
Garimella Rama Murthy
Galina Zverkina
Herwig Bruneel
Ioannis Dimitriou
Janos Sztrik
Konstantin Avrachenkov
Mais Farhadov
Manikandan Rangaswamy
Marian Codreanu
Masakiyo Miyazawa
Michele Pagano

Miklos Telek
Oleg A. Osipov
Onno Boxma

Contents

Stochastic Dichotomous Game-Theoretic Model of Technology Efficiency <i>Vladimir Tsyganov</i>	8
Quorum Analysis for the “Pirate Game” Problem <i>Ilya Chernov and Evgeny Ivashko</i>	24
Time Dependent Diffusion Model for Security Driven Software Defined Networks <i>Tadeusz Czachórski, Erol Gelenbe, Godlove Suila Kuaban and Dariusz Marek</i>	38
Efficient Computation of Equilibrium/Transient Probability Distribution of Arbitrary Finite State Space Continuous Time Markov Chains <i>Garimella Ramamurthy</i>	57
Optimal Strategy Modelling in an Online Auction for the Rent of Computing Resources <i>Anna Ivashko and George Safonov</i>	66
Fork-Join Queueing Systems with Heterogeneous Servers Threshold Control Policy <i>Oleg Osipov and Ekaterina Rogachko</i>	76
Queue with Batch Service, Batch Size Determined by Emergency Customers <i>Sinu Lal T. S., A. Krishnamoorthy and V. C. Joshua</i>	89
Prediction of the Optimal Control in a Multi-Server Heterogeneous Queueing System <i>Dmitry Efrosinin and Natalia Stepanova</i>	102
Gas Quality Determination Using Neural Network Model-based System <i>Ivan Brokarev and Sergei Vaskovskii</i>	113
On a Linear Polymerisation Process <i>Sergei Zuyev</i>	129

CONTENTS

On the Stationary Remaining Service Time in the Queueing Systems <i>Evsey Morozov and Taisia Morozova</i>	140
Stability Analysis of a Model with General Retrials and Constant Retrial Rate <i>Evsey Morozov and Ruslana Nekrasova</i>	150
Simulation a Modified Erlang Loss System with Multi-type Servers and Multi-type Customers <i>Stepan Rogozin</i>	162
Opinion Dynamics Models with Noise <i>E. Konovalchikova and Yu. Dorofeeva</i>	176
Importance Sampling for the Estimation of the Failure Probability of the Degradation Process <i>Oleg Lukashenko and Alexandra Borodina</i>	191
On Stochastic and Failure Rate Orderings in Systems with Two-Component Service Time Mixture <i>Irina Peshkova and Evsey Morozov</i>	203
Stability of Multiclass Multiserver Models with Automata-type Phase Transitions <i>Alexander Rumyantsev</i>	213
Autocorrelation Function Characterization of Continuous Time Markov Chains <i>G. Rama Murthy, D.G. Down and A. Rumyantsev</i>	226
