2) **CMYK Blocks:** Line pattern must be visible.

3) **Targets:** Must be clear and defined from 50 to 400.

1) **Vertical Bar:** Lines must be clear and defined from 2 to 8.

4) **1 Point Type:** Must be legible.

4) **1 Point Type:** Must be legible.

5) **All rule patterns:** Must be clear and defined from 1 to 10.

This is the **GPO Resolution Target**, it must be imaged at 100%, along with the IDEAlliance ISO 12647-7 Control Wedge 2013 (i1) on all **High Resolution** proofs. To ensure your proof is acceptable, it must pass the following criteria:

1) **Vertical Bar:** Lines must be clear and defined from 2 to 8.

2) **CMYK Blocks:** Line pattern must be visible.

3) **Targets:** Must be clear and defined from 50 to 400.

4) **1 Point Type**: must be legible.

5) **All rule patterns:** Must be clear and defined from 1 to 10.

6) **GPO Use**: Targets provided by Printing Industries of America.

IDEAlliance Control Bars

The **IDEAlliance ISO 12647-7 Control Wedge 2013 (i1)** is required to be used when **High Resolution (2400 x 1200 dpi)** proofs are indicated on the SF1.

Either the **IDEAlliance ISO 12647-7 Control Wedge 2013 (i1)** or the **Digital Control Strip 2009** is required to be used when **Ink Jet (720 x 720 dpi)** proofs are indicated on the SF1.

Note: Bars are scaled to 80%, must be 100% on proofs

Customers to indicate Inkjet or High Resolution on the SF1:
