# Remote Sensing

The background of the lower half of the page is a monochromatic green aerial satellite image. It shows a complex network of roads, fields, and a prominent river winding through the landscape. The image is partially obscured by a dark green vertical bar on the right side.

# Message from the Editor-in-Chief

*Remote Sensing* is now a prominent international journal of repute in the world of remote sensing and spatial sciences, as a pioneer and pathfinder in open access format. It has highly accomplished global remote sensing scientists on the editorial board and a dedicated team of associate editors. The journal emphasizes quality and novelty and has a rigorous peer-review process. It is now one of the top remote sensing journals with a significant Impact Factor, and a goal to become the best journal in remote sensing in the coming years. I strongly recommend *Remote Sensing* for your best research publications for a fast dissemination of your research.

## Aims

*Remote Sensing* (ISSN 2072-4292) publishes regular research papers, reviews, technical notes and communications covering all aspects of remote sensing science, from sensor design, validation/calibration, to its application in geosciences, environmental sciences, ecology and civil engineering. Our aim is to publish novel/improved methods/approaches and/or algorithms of remote sensing to benefit the community, open to everyone in need of them. There is no restriction on the maximum length of the papers or colors used. The method/approach must be presented in detail so that the results can be reproduced. Moreover, authors are encouraged to submit their original codes/data as supplementary information for the paper.

---

## Scope

- Multi-spectral and hyperspectral remote sensing
- Active and passive microwave remote sensing
- Lidar and laser scanning
- Geometric reconstruction
- Physical modeling and signatures
- Change detection
- Image processing and pattern recognition
- Data fusion and data assimilation
- Dedicated satellite missions
- Operational processing facilities
- Spaceborne, airborne and terrestrial platforms
- Remote sensing applications

---

## Author Benefits

### Open Access

Unlimited and free access for readers

### No Copyright Constraints

Retain copyright of your work and free use of your article

### Thorough Peer-Review

### 2023 Impact Factor: 4.2

*(Journal Citation Reports - Clarivate, 2024)*

### Discounts on Article Processing Charges (APC)

If you belong to an institute that participates with the MDPI Institutional Open Access Program

### No Space Constraints, No Extra Space or Color Charges

No restriction on the maximum length of the papers, number of figures or colors

### Journal Rank

JCR - Q1 (Geosciences, Multidisciplinary) /  
CiteScore - Q1 (General Earth and Planetary Sciences)

### Coverage by Leading Indexing Services

Scopus, SCIE (Web of Science), Ei Compendex, PubAg, GeoRef, Astrophysics Data System, Inspec, dblp, and other databases

### Rapid Publication

A first decision is provided to authors approximately 24.7 days after submission; acceptance to publication is undertaken in 2.8 days (median values for papers published in this journal in the first half of 2024)
