Papers

Lexical Simplification:

Simplificación Léxica para la Mejora de la Accesibilidad Cognitiva (Lexical Simplification to Improve Cognitive Accessibility)	
Rodrigo Alarcón García	1-7

Affective Computing:

Using Linguistic Features for Improving Automatic Text Classification Tasks in Spanish	
José Antonio García Díaz	8-15
La Clasificación de Emociones y su Aplicación a la Detección del Lenguaje Ofensivo (Emotion Classification and its Application to Offensive Language Detection)	
Flor Miriam Plaza del Arco	16-22
Multilingual and Multimodal Hate Speech Detection in Social Media	
Gretel Liz De la Peña Sarracén	23-30

Fake News:

The Disinformation Battle: Linguistics and Artificial Intelligence Join to Beat it	
Alba Bonet Jover	31-37
Identification of Fake News by Contradiction Detection in Texts	
Robiert Sepúlveda Torres	38-43
Profiling and Detecting Fake News Spreaders on Social Media	
María Soledad Espinosa Ruiz	44-50

Biomedicine:

Reconocimiento de Entidades Biomédicas para el Español mediante la Combinación de Word Embeddings

(Recognition of Biomedical Entities in Spanish by Combining Word Embeddings)

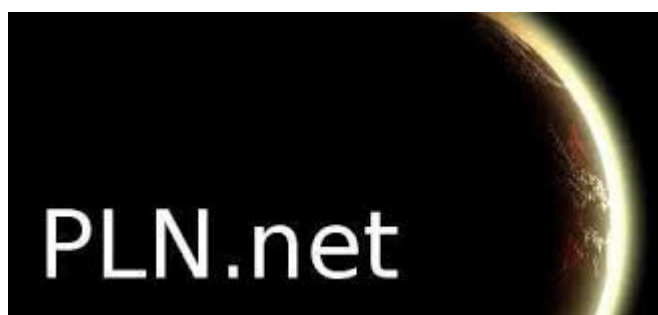

Pilar López Úbeda51-57

Avances en el Análisis y Tipificación de Errores para una Propuesta de Mejora de Informes Médicos en Español

(Progress in the Analysis and Classification of Errors for a Proposal to Improve Medical Reports in Spanish)

Jésica López Hernández..... 58-63

Acknowledgements

The organization of the Doctoral Symposium 2020 has involved researchers from the thematic network of excellence (PLN.NET 2018) funded by the Ministerio de Ciencia, Innovación y Universidades for the creation of lively communication forums among Natural Language Processing researchers (RED2018-102418-T).

CEUR Workshop Proceedings

**Proceedings of the Doctoral
Symposium on Natural Language
Processing from the PLN.net network
(PLNnet-DS-2020)**

Preamble

The PLN.net thematic network organizes the Doctoral Symposium on Natural Language Processing that has been held virtually on December 16, 2020 from 16:00 to 20:00.

The Doctoral Symposium aims to be a meeting point where PhD students in the area of Natural Language Processing can present their work. Moreover, they receive constructive feedback and guidance from experienced researchers in their area of work.

In the 2020 edition, 9 PhD students participated: 1 focused on the task of Lexical Simplification, 3 on Affective Computing, 3 on Fake News and 2 on Biomedicine. All participants submitted a paper describing their proposals, all of them being accepted after review by two members of the program committee and by the organizing committee.
