

Peer review declaration

All papers published in this volume have been peer reviewed through processes administered by the Editors. Reviews were conducted by expert referees to the professional and scientific standards.

Type of peer review: Triple-blind

Criteria used by Reviewers when accepting/declining papers. All submitted articles underwent triple-blind review. The reviewers were based on the assessment of the topic of the submitted materials, the relevance of the study, the scientific significance and novelty, the quality of the materials, and the originality of the work.

Conference submission management system:

1. Sending materials to the organizers of the conference;
2. Verification of compliance with the subject of the conference;
3. Checking materials for plagiarism using two systems (originality of the text at least 80%);
4. Submitting for triple-blind review;
5. Checking the quality of translation of the article into English;
6. Checking for the correct design of materials;
7. Submission of materials.

Number of submissions received: 43

Number of submissions accepted: 20

Acceptance Rate (Number of Submissions Accepted / Number of Submissions Received X 100): 46 %

Total number of reviewers involved: 17
