

Journals | CONSULT

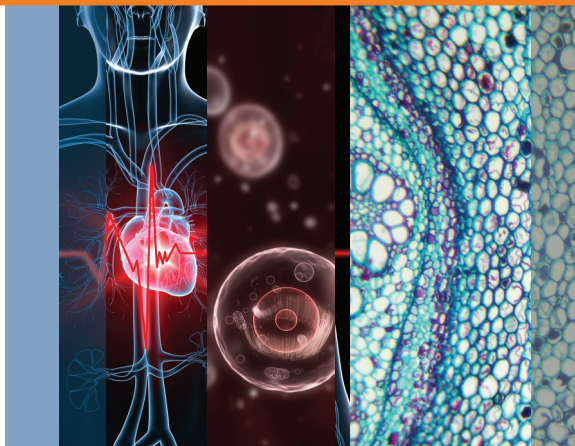

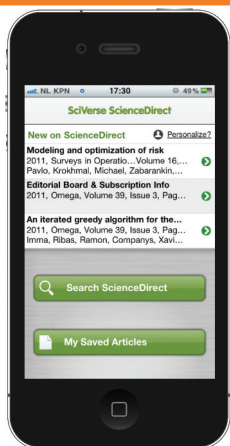

Powered by SciVerse ScienceDirect

Instant online access to a customizable selection of the most essential clinical and health sciences journals for improved clinical — and patient — outcomes

www.JournalsConsult.com

Current. Clinical. Customized.

Select from over 2,000 Elsevier journals, including more than 800 health sciences titles.

- **Fast, convenient 24/7 online access throughout your institution and remotely.** Allows all users to access your journal collection from any onsite terminal or via self-managed remote access based on email authentication.
- **No log-in required.** With Journals Consult you can provide IP-authenticated, institution-wide access to your Elsevier journals.
- **A direct link to authoritative content.** Users can quickly click through content to find answers to clinical questions — when and where they need them most.
- **Detailed electronic usage reporting.** Pinpoints specific areas of interest and access.

Customize your journal collection using a flexible “a la carte” purchasing model exclusively for healthcare institutions.

- **Match current print holdings or expand your current collection.** Choose the topics that complement your hospital’s specific areas of practice.
- **Choose the format that’s right for your hospital.** Select individual journals in online or print format only, or order both print and online access for greater value.
- **Integrate seamlessly with MD Consult** to enhance search results.
- **Save space and reduce costs.** Online access plus four years of online archives help you make more efficient use of your budget and storage capacity.

Rely on peer-reviewed medical journals from the world’s largest publisher of trusted scientific, technical and health information.

- **Content from industry-leading journals.** Titles include *The Lancet*, *Journal of the American College of Cardiology*, *The American Journal of Medicine*, *Gastroenterology*, *The Journal of Urology* and many others.
- **Add depth to your library collection.** Significantly enhance your current holdings by adding additional content.
- **Put critical information at physicians’ fingertips.** With rapid online publication, your medical staff can be among the first to access the latest research and clinical information, up to 8 weeks before it’s released in print.
- **Empower your constituents to stay current in their fields with personalization options.** Customized alerting options via automatic email alerts or RSS feeds enable users to find the information they require — fast!
