

TRIP TO MARS (AGES 6-10+)

What's the longest trip you've ever done? How long did it take you? A few hours? Even some days? Were you tired after that?

A trip to Mars would take astronauts between 5 to 10 months!

And astronauts would be stuck inside a spaceship for this whole time! The lockdown because of the coronavirus is not that bad anymore, is it?

Can you help the spaceship below to reach Mars in less than 5 months? Watch out the asteroids!
