EARTH DAY

PATHWAYS TO NEW DISCOVERIES

Earth science is about decoding our planet's mysteries. From space, the air, and on the ground, we track changes in our atmosphere, water, and land that help us to understand how Earth is changing and why.

Our 2022 Earth Day poster represents how Earth's systems are connected, and features QR codes that link to NASA web pages for more information, videos, activities, and other online resources.

Landsat 9

Explore 50 years of eyes on our changing planet
<https://www.nasa.gov/specials/landsat>

Climate Time Machine

Check out how some of Earth's key climate indicators are changing over time

<https://climate.nasa.gov/interactives/climate-time-machine>

Climate Quizzes

Test how much do you know about our planet and its systems

https://climate.nasa.gov/climate_resource_center/interactives/quizzes

Images of Change

Compare before-and-after images of natural and human-caused change

<https://climate.nasa.gov/images-of-change>

Eyes on Earth

Track satellites and see near-real time readings of Earth's vital signs

<https://eyes.nasa.gov/apps/earth>

Benefits from Space

See how NASA space technology is adapted for use on Earth

<https://spinoff.nasa.gov>

Snack Time with NASA

Explore the science behind the food on your plate

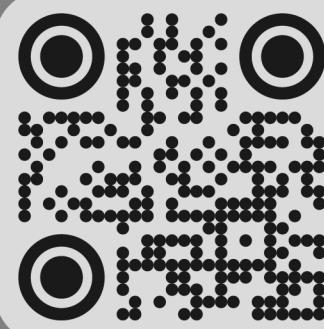

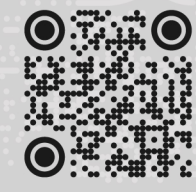

<https://go.nasa.gov/3uSA8KW>

Rising Tides

Learn more about sea level rise

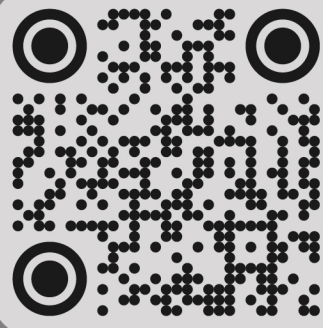

<https://sealevel.nasa.gov/resources/103/video-rising-tides-understanding-sea-level-rise>

Benefits on Earth

Read about how NASA's observations from space help life on our home planet

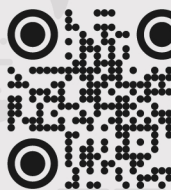

<https://www.nasa.gov/content/benefits-on-earth>

GLOBE Observer

Participate in NASA Earth science observations with this mobile app

<https://observer.globe.gov>

Earth from Afar

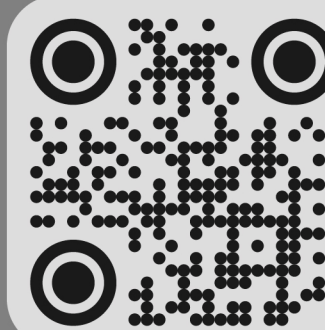

Appreciate the beauty of Earth as seen from space
