Dear Div. J Members,

I hope the end of the summer break period finds you well and ready to start a new year of research that will lead to interesting and exciting scientific results. I remind you that, normally, the [31st IAU General Assembly](#) will be held at the end of August 2021, in Busan, Republic of Korea. Registrations will start in January 2021.

I also remind you that Div. J maintains a set of [web pages](#) with two sections that could be useful for us: News and Meetings. If you want to have some information about Div. J-related News or Meetings, please send me an email and, if they are relevant, we will post them on the web site.

Best regards,

Denis Burgarella  
President of IAU Galaxies and Cosmology Division
